Sbj.: MERO Combi-docking Systems at Lufthansa German Airlines

Gentlemen:

As you already know we recently inaugurated our B747/A300 hangar in Hamburg. Two innovative MERO Airport Technik's overhaul combi-docking systems for wide-body aircraft, i.e. B747 line and A 300 line, have been created in cooperation with MERO engineers and represent one of the very important developments to achieve the high level of productivity in our Overhaul Center.

I would like to take the opportunity to thank you for all past associations and for the very good cooperation of MERO Airport Technik and Lufthansa in general and of both our technical teams in particular, when we were defining, specifying and finally operating your products. With your support and indispensable assistance we have gone in the past several times successfully through this process of confidence that has formed every long lasting cooperation.

I am sure we will continue this good relationship in the future in order to provide and operate the best possible product.

Sincerely,

Dr. Klaus Stahlschmidt  
Vice President Aircraft Overhaul
